To all our Customers

SUBJECT: SEQUENTIAL FUEL INJECTION SOFTWARE VERSION 5.7.0 C

We are glad to inform you that the new Sequential Fuel Injection Software version **5.7.0 C** is now available on our website www.tartariniauto.it

It is possible to download it by accessing the private area in directory **Car Data Sheet / Menu English Technical area / Software Programs / Sequential Fuel Injection System/SGI-Software-Version 5.7.0_C.zip**

The new Software **MUST** replace the older version (older version must be uninstalled before installing new version 5.7.0 C) because it includes the most updated functionalities of:

- **AUTOCALIBRATION with rail TARTARINI EVO 07**
- **AUTOCALIBRATION with rail TARTARINI EVO 08**

WARNING !

Do not load old configuration files on the new vehicle you will install with the new rails EVO08 & EVO07.

The old configuration files that were saved with old rail TARTARINI either Standard or Super are based upon different pilot-parameters to control the rail injectors, therefore its configuration & injection map would result to be incorrect.
